MEDIA SERVICES

today

Media determine our daily business. We have always been experts concerning technical handling of image, graphics and print data. Business processes as well as media diversity and applications have fundamentally changed. Cloud solutions become increasingly important, too.

Today, marketing has much more to do with the value chain.

We prepare data, manage data and produce commercial information - printed, as well as online.

Starting with customized counseling up to ready for sale products from a single source - an advantage that is reflected in quality, delivery times and not least in terms of pricing, benefitting smaller orders as well.

We offer individual, innovative solutions and provide services in the areas of fulfillment, warehousing and dispatch, helping our customers to achieve their goals while keeping their backs taking pressure off of them in daily business.
